BOOK SYNOPSIS

This book provides a comprehensive survey of the major legal issues that arise in the course of a construction project. The structure of the book first focuses on the major participants on a project and the relationships and interests of each of participant. It then shifts to chapters on recurring themes in construction law such as the economic loss rule, calculation of damages, and defective construction. While making the concepts accessible for any reader, the book provides a logical structure for those teaching construction law to use as either the primary or supplemental reading for the course.
